

Quick Facts: Island of Hawai'i

The largest of the Hawaiian Islands, the Island of Hawai'i is home to some of the most unique and inspiring settings in the world, from rugged landscapes, to black-sand beaches, to the active Kīlauea Volcano, to lush rainforest and valleys. All but four of the world's 14 climate zones can be found on the Island of Hawai'i, making the Island of Hawai'i's reputation as a sportsman's paradise well deserved. The sunny Kohala coast is home to the island's finest meetings resorts, but rural accommodations and event spaces set amid rolling pastures or lush coffee plantations offer unique locations for small retreats or special events.

Flower:	Lehua
Color:	Red
County Seat:	Hilo
No. of Rooms:	7,184
Population:	196,428
Area:	4,028 sq mi (10,430 km ²)
Length:	93 mi (150 km)
